

AES HOME APP

We have developed a more user-friendly option, the AES HOME App, specifically tailored for an individual property to conveniently program their AES intercom.

- Open, hold open & close commands via call or SMS (for entrance/gates).
- Easy to programme dial-out numbers, caller ID numbers, Keypad codes & Prox card/tags.
- Send SMS to check, signal levels, relay status, events, stored numbers, stored keypad codes & technical information etc.
- Incorporate multiple users (up to 4) to receive activated notifications from gates.
- Set automatic relay times (7-day/24hr format).
- Set do not disturb (DND) times (7-day/24hr format).
- Languages, EN, DE, FR.

The AES HOME App is exclusively intended for use with the single button **CELLCOM PRIME7*** system.

*While the HOME App can be used with older systems like PRIME6, some features may not be accessible.

AES PRO APP

Our AES PRO App is designed with the installer in mind, and encompasses almost our entire Cellular intercom range.

Are you an installer? If so, our PRO APP would be the ideal choice, as it enables you to store sites and intercoms via the cloud, providing the convenience of logging in from any phone. Share sites/intercoms with others and troubleshoot issues without having to travel to the site!

- Troubleshoot issues from anywhere in the world.
- Create user accounts and establish app passwords.
- Program even more features for more complex sites.
- Plus more.

Compatible with the following products: Cellcom Prime7 Single & Multi button, Multicom Range Classic, Lite & Mini, Modular Single & Multi button units and Keycell.
