## Bringing you the latest access control systems to secure your home.

We are one of the largest manufacturers of **Cellular, Wireless, IP** and **Wired audio** and **Video intercoms**. Many of our access control products are available for purchase through dealers and sales outlets in over 40 countries worldwide. All of our products come with a **2 year warranty** and free technical help and support.

Our intercoms are made from the highest quality materials and are available in a range of different technologies to provide a solution to all types of entrances.

We use brushed BS316 marine grade stainless steel for corrosion resistance. Some units have black powder coated steel (other colours are available for bespoke units, ask your sales rep for more information). Tough gloss acrylic faceplates give the units a modern look, perfect for any entrance.

## WIRELESS VEHICLE DETECTION SYSTEM

**The e-Loop Mini replaces traditional wired inductive loops, saving you time and money while increasing reliability!**

Domestic Wireless Vehicle Detection System uses magnetometer sensors to detect the presence and movement of vehicles. These detections are transmitted to a nearby transceiver for gate activation. The sensors are installed on the surface of entry or exit passages using concrete fixing bolts, and contain two replaceable AA batteries.

### FEATURES

- Quick and easy installation.
- Small compact design (120mm x 120mm x 30mm high) (4.7" x 1.1").
- Static load capacity 2500kg (5500 lbs).
- Uses standard 1.5V AA Lithium batteries (included).
- Providing up to 3-4 years battery life.
- High security 128-bit encryption.
- Range up to 50 meters/yards.

Now available in presence mode. This mode intelligently keeps gates/entrance open for an extended duration when longer vehicles are in motion over the detection area.

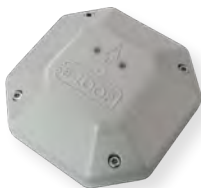

## PRESENCE MODE WITH ADDED RADAR PROTECTION.

Dual sensor technology. Magnetic field and Radar detection.

### EL00M-RAD

# Commercial e-Loops

Save hours of installation time compared to wired loop systems.

Both e-loop models are available in two modes: **PRESENCE MODE WITH ADDED RADAR PROTECTION OR EXIT MODE.**

- Quick and easy installation.
- Not effected by ground movement.
- High security 128 bit encryption.
- Range 50 metres/yards.
- IP68.

## Commercial E-loop Surface Mounted.

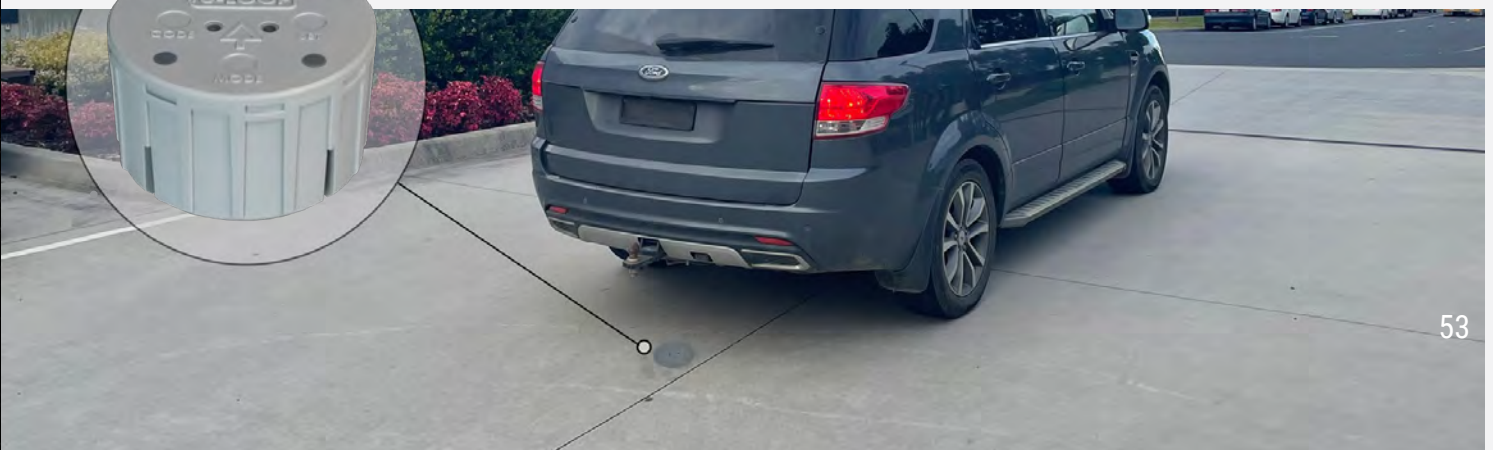

- Dual sensing technology. (EL00C-RAD only).
- Compact profile – (220mm x 28mm) (8.6" x 1.1").
- 10600 mA battery (included) giving up to 6-10 years battery life (depending on mode).
- Made of high-impact plastic (10 tonne static load limit).

## Commercial Inground E-loop.

- Dual sensing technology. (EL00IG-RAD only).
- Recesses into the driveway – 55mm in ground height x 89mm diameter (2.1 x 3.5 Inches).
- 14500 mA battery (included) giving up to 6-10 years of battery life (depending on mode).
- Top access for changing the battery.

# e-Loop Long Range Gate Opening System.

Our long-range gate opening system offers homeowners unparalleled convenience by eliminating the need to physically approach the gate. With a simple push of a button on a fob (E-TX), homeowners can effortlessly open or close their gates from the comfort of their homes. This feature is particularly useful during inclement weather, late-night arrivals, or when in a hurry.

With the ability to open gates from up to a range of 350 metres (450/500 metres options).

# e-Loop Accessories

Transceivers / Remotes / Antenna.

## ETRANS50

E-Trans 50 Transceiver.

## ETRANS100

E-Trans 100 - 2 channel transceiver.

## ETRANS200

E-Trans LCD 200 Transceiver.

## EDR00

Diagnostic remote. Bidirectional remote – the ideal tool for the e-Loop range.

## E-TX

4 Key Fob Remote Control. Compatible with all (e-Loop) transceiver products.

## E-REMOTE

3 Channel transmitter with lock and unlock function. Use with 200 Code receiver.

## E-KEYPAD

Remote Push button/ Keypad 4 Number 8 Combination.

## ANT-12

12 dBI antenna for the e-Loop range.

## ANT-30

30 dBI antenna for the e-Loop range.

## E-TRIGGER

### Wireless relay bridge

With the e-Trigger device you no longer need to wire an intercom (or another 3rd party device) directly into a gate motor. This unit connects to a wireless transceiver housed & connected to the gate motor.

When the gates have been triggered, the e-Trigger device creates a wireless bridge to the transceiver on the gate motor, activating the relay and opening the gates.

# Pedestal Adaptor

We have created a special adapter plate for pedestals/goosenecks. If you like the aesthetics of our Architectural and Imperial range, you can now mount them on a pedestal/gooseneck using our adaptive plate.

Very easy to install. Simply attach unit to the front plate, then marry up the front plate to the back plate which is mounted to the gooseneck and secure using 4 nuts.

## Architectural Panels Mounting Plates

**ABK-PED-B-PLT**

Architectural black powder coated mounting plate for European Architectural panels (\*gooseneck applications). Kit comes with gooseneck mount plate and intercom mount plate.

**ABK-PED-SS-PLT**
